

Role-based Authorization in SRM-dCache

Ted Hesselroth

Fermilab

LCG Baseline Services

“The storage system should respect permissions on directories based on VOMS roles and groups.”

-Working Group Report, June 24, 2005

- Roles assigned by VO according to expected functions
- Privileges granted by site according to role
- Roles used in both Compute Elements and Storage Elements.

gPlazma Authorization

gPlazma as a cell in dCache
